## Commercial Space Application

Hanging out with friends in a sports bar during sports events is a great pleasure to many sports fans. Some of them open sports bars simply because they are so fascinated with it. The main facilities to run a sports bar are big TVs. But those big displays are quite expensive causing cost issues to open a bar. A video wall is a good solution to reduce the cost while maximizing the screen size. This solution builds up a video wall for sports programs and uses an HDMI splitter to play advertisements in the bar. UNICLASS had led the KVM industry with versatile solutions for more than 26 years in +35 countries around the world. We hope you enjoy your life and love our innovations!
